

I am writing to urge that the FCC reject NAB's petition 04-160 to limit the type of content provided by XM Satellite Radio, specifically, the Instant Traffic & Weather. As a paid service, I don't understand why anyone should have the right to limit what I am able to listen and the information I can get. Traffic and Weather information on XM Radio is an invaluable resource, unlike anything available anywhere else. When was the last time you tuned your AM or FM radio just before you left the house only to INSTANTLY hear road conditions? It' just NON EXISTENT. So please, don't limit my XM radio content!
